

UIU ROBOTICS  
A Step Towards Infinity!

## Poster Presentation

The format for the competition is in two stages - display of a poster whilst answering informal questions from the judges, followed by a **3-minute presentation** of the poster with a **2-minute question/answer session**. Selection for progress to stage 2 will be carried out on the day by a panel of judges.

The poster should be no larger than 1 sheet **poster** and can contain text, maps, diagrams, photographs, etc. as desired. **A high quality 'professional' visual presentation is not sought.** However, clarity, brevity and technical competence is required.

The poster should include a summary of the geotechnical or geological work carried out including a statement of the aims of the project or study, the methods employed and the results gained together with analysis, conclusion and recommendations. The subject matter may relate to any aspect of industrial practice or related work where geotechnical or geological skills have been used. **Examples could include site investigation, prototype, construction, monitoring, case study back analysis or research.**
